

BOYAN BOYANOV

FRONTEND ENGINEER

+359 89 7900 790 | b.i.boianov@gmail.com

PROFESSIONAL SUMMARY

Frontend Engineer at DXC Technology with 4+ years in software engineering and 3+ years building large-scale React and TypeScript applications for the public sector. Currently owning the frontend architecture of a new Vue, Pinia and Quasar application, deriving workflows and requirements through analysis of a comparable existing system.
1st place at a company hackathon and volunteer mentor in DXC's neurodiversity program. Before software engineering: nearly 20 years in 3D design and team leadership.

CORE SKILLS

- **Frontend**: React, TypeScript, JavaScript (ES6+), Vue, HTML, CSS, Responsive Design, Accessibility.
- **State & UI:** Zustand, Pinia, Quasar, Component-based Architecture.
- **Additional**: Three.js, Next.js, REST APIs (Java/Spring backends), SQL, Power Apps, SharePoint.
- **Tools & Delivery**: Git, GitHub, Jira, Confluence, Agile/Scrum (PSD I, PSM I).
- **Engineering & Collaboration**: Requirements Analysis, UI/UX Design, Mentoring.

WORK EXPERIENCE

DXC TECHNOLOGY — Software Developer (Frontend)
Jun 2022 – Present
Promoted twice, including one promotion across two internal grade levels.

KEY PROJECTS

Healthcare Platform (EU public sector client) · Vue.js, Pinia, Quasar · Jul 2026 – Present

- Reverse-engineering a comparable existing application to derive workflows, business rules and requirements for a new frontend.
- Defined the frontend architecture and application structure from the ground up.
- Implemented dynamic UIs for rule-driven decision flows based on client-provided mockups.
- Worked with Business Analysts to turn the reference system's behavior into validated requirements.

FRONTEND ENGINEER
+359 89 7900 790
b.i.boianov@gmail.com

Tax Platform (EU government client) · React, TypeScript, Zustand · Sep 2023 – Oct 2026

- High-traffic workflow platform handling long-lived structured data, built by a team of 20+.
- Integrated React frontends with Java-based backend APIs and complex validation rules.
- Implemented predictable global state flows with Zustand across complex feature areas.
- Acted as a bridge between frontend, business analysis and QA, identifying incomplete requirements and edge cases before implementation, reducing rework risk.
- Performed regular code reviews and supported colleagues with business-logic clarifications.
- Enforced clean CSS and semantic HTML for accessible UI.

Workplace Parking Platform · Product Owner · Power Apps, SharePoint · Feb 2024 – Jun 2024

- Internal app for reserving the office's limited parking spaces, live in production.
- Acted as Product Owner, Business Analyst and Scrum Master: defined requirements, priorities and delivery scope, and managed the backlog in Jira.
- Designed the application's UI/UX and coordinated testing and production adoption.
- Mentored a Dandelion Program participant throughout the project.

Enterprise Reporting Platform · SQL, Argos · Sep 2022 – Sep 2023

- SQL reports and interactive dashboards on a highly interconnected enterprise data model.
- Ensured data consistency and governance across reports.

ACHIEVEMENTS

1st Place Winner – DXC Technology Innovation Hackathon (Nov 2024)

- Awarded for overall solution quality, execution, and user experience (UX).
- In a team of 3, owned the frontend architecture, designing and implementing an interactive, event-based gaming platform from scratch using React, Zustand, and real-time interaction flows.

Developer & Mentor (volunteer) – Dandelion Program (neurodiversity), DXC (2023 – 2025)

- **First software developer** to join the Bulgarian launch of DXC's employment program for neurodivergent IT talent, from its preparation phase.
- Helped design the programming training and adapt it into **individual learning plans** while mentoring participants.

CERTIFICATIONS & TRAINING

- Professional Scrum Developer I (PSD I) – Scrum.org (2025)
- Professional Scrum Master I (PSM I) – Scrum.org (2024)
- Telerik Academy Upskill: React (2024)
- JS Web Developer Program – SoftUni (2020 – 2022): React, Angular, Node.js, JavaScript.

EDUCATION

- **Master's Degree in Software Engineering (2024 – 2025)** | University of Library Studies and Information Technologies (ULSIT)
- Bachelor of Marketing (2005 – 2009) | University of Economics – Varna
